

# Full-stack WEB developer

Job description [updated on 14.01.2021]

## About us

**Funplox** is an independent start-up entertainment company primarily focusing on game-development for a large range of audiences for every major platform: iOS, Android, Windows, macOS, Nintendo Switch and VR.

We are looking for active and passionate people to join the team and create unforgettable experiences together.

# You are

An active and engaged person who is ready to take on the challenge of learning new technologies and trying to apply them in a real project.

You need to have an interest in setting up the project on AWS or similar base and developing the applications.

## Job requirements

- 2+ years in server-side development
- Proficiency in any of the following technologies:
  - Ruby for Ruby on Rails
  - JavaScript for Node.js
  - PHP
  - Python
- Experience working with Docker
- Basic knowledge of AWS
- Ability to write unit-tests for your code
- Experience working with Git
- Solid understanding of Design Patterns by the GoF is a must

## Nice-to-have skills

- Basic English
- Designer skills
- Experience with Vue.JS or React

## Job responsibilities

- Participating in project planning
- Taking the lead role in project development
- Writing unit-tests for your code
- Uploading your code to Git daily
- Setting up services such as AWS, Azure, Shopify, Stripe, PayPal etc.

## Job conditions and perks

- This is a remote job opportunity.
- Full-flex time with no core time means you can choose your work hours as you wish, so long as you can join the planned meetings.
- You can choose to work as a freelancer or on a permanent basis.

## How to apply and interview process

We are happy to receive applications and carefully evaluate each resume. To help us speed up the process, please follow the flow described below.

### How to apply

Send your resume and cover letter to [jobs@funplox.com](mailto:jobs@funplox.com). In the cover letter please highlight your experience, knowledge and/or interests. If you have experience in using any of the listed technologies, please provide links.

### Screening & first interview

Your resume will be evaluated by Funplox staff. Successful candidates will receive an invitation to a phone interview.

The first interview will be the technical interview followed by a ~1-2 hours coding test (the test can be done in your own time).

### Last interview

The last phase is a phone interview with the CEO of Funplox. You will negotiate contract details, availability and starting date.
